

Our New Location Will Open in Late February

Cardiac and Pulmonary Rehabilitation Services

We are pleased to provide you with this update on the future location for Cardiac and Pulmonary Rehabilitation Services.

Construction teams are busy working on our future home. Beginning **in late February**, all cardiac and pulmonary treatment and services will take place in our new space, located at:

Northwestern Medicine Grayslake Outpatient Center

Pavilion C, Second Floor
1475 East Belvidere Road
Grayslake, Illinois 60030

The space is designed specifically for your care and comfort. It features amenities such as:

Large windows with bright, natural light and views of the Grayslake campus

An expanded space to accommodate all Phase 2 and Phase 3* programs and classes

Large, comfortable common areas to create more opportunities for socialization

A dedicated patient parking lot just outside the Pavilion C entrance, as well as complimentary valet parking at the main entrance

Rendering of the new check-in and waiting area

The new space will be located near the cardiology and pulmonary clinics and physician offices within the Grayslake Outpatient Center. This means you can receive all your care and schedule all your appointments in the same place, including imaging and laboratory hospital services.

Careful consideration was made regarding the move from Lake Forest to Grayslake. We understand the importance of cardiopulmonary rehabilitation to our community and remain committed to providing services in Lake Forest in the future.

We look forward to providing you with the high-quality care you expect from our team. If you have any questions, please ask a member of your care team.

*In response to COVID-19, our Phase 3 program continues to be on hold. We will reopen Phase 3 in the new year with modifications that prioritize the safety of our patients and staff. We will reach out to our Phase 3 patients with further information in the coming months.
